

ABSTRACT

Saturday, February 09, 2002

The Thermangel has many practical advantages which have been previously mentioned such as cost-effectiveness of patient care, improved patient outcomes, convenience, enhancing the current clinical practice of medicine. All age groups stand to benefit from the invention of the Thermangel. We will be better able to manage the health of many people by utilizing this thermocorrecting device. In addition, with an aging population and a nursing shortage we must find ingenious ways to cut cost and improve care.
